Study of matter teams must have this - CodyCross Answers ...

Chemistry is the study of matter and energy and the interactions between them. This is also the definition for physics, by the way. Chemistry and physics are specializations of physical science. Chemistry tends to focus on the properties of substances and the interactions between different types of matter, particularly reactions that involve electrons. Physics tends to focus more on the nuclear part of the atom, as well as the subatomic realm.

Chapter 1.1 Flashcards | Quizlet

a process in which the state of matter changes but the identity of the matter does not change
chemical property any property of a substance that cannot be studied without converting the
