It can be a change in the paper or a note for the referee. As for whether or not the paper is "interesting": I decline to referee a paper if it is not interesting (in a broad sense) enough for me to put the effort in checking whether or not it is correct. Thus if all referees were correctness minded, then "interesting" papers would get their ...

My experience is that usage varies. In my field, it is common to use 'referee' for the person who anonymously comments on a paper submitted to a journal, and 'reviewer' for the person who writes about a paper already published to appear publicly in a database. However, people I know in similar areas use 'reviewer' for the first meaning.
