The A/C system in your Sierra 1500 consists of a compressor that is belt-driven, an evaporator and freon. If there is a problem with your compressor or evaporator, adding freon will not restore cooling. How to add freon to your 2007 GMC Sierra 1500: hook up the can of refrigerant (likely r-134a) to the low pressure port.

**my.gmc.com**

I guess its good to know, but you will use the gauge from the kit to figure out how much refrigerant to add to the system. You are not going to remove the refrigerant that is already in the system and refill to the listed capacity. You are just adding what is needed. Last year we just had 2 lbs added to our central air at home.
