The diagram below shows the parts of a Jeep TJ steering and suspension. Picture provided by www.4x4xplor.com. When bump-steer occurs the suspension moves in a vertical plane and the drag link is trying to be lengthened or shortened by this movement. Since its length cannot be changed then the only way to shorten or lengthen it is to turn the ...

On a Jeep, you normally have five lugs which makes measuring a bit tricky, but not difficult - you just need to measure the bolt pattern circle (the yellow circle on the diagram below). To do that, pick any bolt hole to start from, align your ruler at the outer most edge of the hole, then skip one bolt hole and measure to the center of the next ...
