Chapter 1 - Personal Finance Basics and the Time Value of ...

Let's consider the effects of starting early or late to save for retirement. Assume that each account considered has an APR of 6% compounded monthly. At age 20, you realize that even a modest start on saving for retirement is important. You begin depositing \$50 each month into an account. Now suppose that at age 40, you finally get a job where your employer puts \$400 per month into an account.
