It has been discovered that the genetic material is protein. ____ TF 2. Hershey and Chase were the first two scientists to ...

Answer Key To The Nucleic Acids - Lesson Worksheets

Questions with Answers- Nucleotides & Nucleic Acids A. The components and structures of common nucleotides are compared. (Questions 1-5) 1. ____ Which structural feature is shared by both uracil and thymine? a) Both contain two keto groups. b) Both contain one methyl group. c) Both contain a five-membered ring.

Nucleic Acid Worksheet - Monroe Township School District

Nucleic acids DNA - The Double Helix Recall that the nucleus is a small spherical, dense body in a cell. It is often called the "control center" because it controls all the activities of the cell including cell reproduction, and heredity.

Nucleic Acids Lesson Plans & Worksheets | Lesson Planet

Nucleic acids are formed by sequences of nucleotides. Nucleotides are composed of one molecule of sugar (deoxyribose in DNA and ribose in RNA) bound to one molecule of phosphate and to one nitrogenous base (adenine, uracil, cytosine or guanine, in RNA; and adenine, thymine, cytosine and guanine, in DNA).
